

10 AI Skills

You Need In 2026

1-Prompt Engineering

What It Is:

The difference between the average output and the answers you can act on.

When To Use It:

Any time you need AI to think like a strategist or operator and not as a chatbot

Tools:

Perplexity

ChatGPT

Claude

Gemini

2-AI Agents

What It Is:

Agents are an AI that doesn't just reply but actually completes tasks end-to-end without your input.

When To Use It:

Automating jobs you'd normally hand to an intern or burn your time: lead gen, research, scheduling, etc.

Tools:

Agent GPT

Creaw AI

LangGraph

LangChain

3-Workflow Automation

What It Is:

Linking your tools together so routine work can happen without you.

When To Use It:

Reporting, onboarding, data entry, etc. If it's repeatable you can automate it with these tools

Tools:

Zapier

Make

N8N

Bardeen

4-Agentive Agents

What It Is:

AI that can plan, adapt, and self-correct instead of simply following a fixed script.

When To Use It:

Complex, multi-step tasks like research, ops, or QA where flexibility is more important than rigid workflows

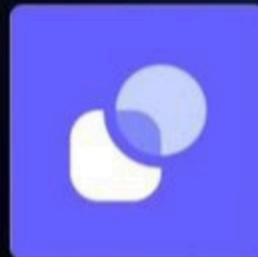

Tools:

DSPY

Adept

Relevance

UiPath

5-Multimodal AI

What It Is:

AI that works across text, images, audio, and code in the same flow

When To Use It:

Turning a rough idea into a full campaign: copy, visuals, video, voiceover

Tools:

Stable Audio

Inworld

Sonnet

Runway

6-RAG

(Retrieval-Augmented Generation)

What It Is:

Teaching AI to pull from your data instead of making things up.

When To Use It:

Customer support, sales enablement, internal knowledge accuracy matters.

Tools:

Pinecone

LlamaIndex

Hay Stack

Elastic

7-AEO-GEO

(Answer & Generative Engine Optimisation)

What It Is:

SEO for the AI era. Making sure your brand shows up in AI answers.

When To Use It:

When your prospects start asking ChatGPT instead of Google for specifics about your brand or sector.

Tools:

Cognizo AI

Scrunchi

Trakkr

AriOps

8-AI Tool Stacking

What It Is:

Combining your favourite tools so they run as one system.

When To Use It:

To build always-on workflows that cut costs and free up your team.

Tools:

Notion AI

Click UP

Arcads

Artable AI

9-AI Content Generation

What It Is:

Content at scale without building a 10-person marketing team.

When To Use It:

Daily posts, video edits, podcasts, repurposing long-form into short.

Tools:

Discript

Opus Clip

ElevenLabs

HeyGen

10-LLM Management

What It Is:

Controlling cost, accuracy, and performance across the AI you use.

When To Use It:

Once AI becomes core to your operations and you need visibility on ROI.

Tools:

Arize AI

Tru Lens

Helicone
